

Meeting called to order by Chair Dan Dawson at 6:47 pm. All committee members were present. Public Works Director Rob Hancock discussed the need to replace the impellers on 2 of the 3 pumps at the dairy queen storage facility. The impellers have corroded and cannot maintain enough pressure to fill the storage tank. The impellers need to be replaced with impellers of a different material at an estimated cost of \$24,750. The committee recommends approval of the repair and will pass it on to the council.

Motion to adjourn By Troy Turner, seconded by Elizabeth Hellrung. Meeting adjourned at 7:04 pm.
